ceuler & corter Fever and Ague, from which manified suffer over a large part of the globe, is the consequence of a diseased action in the system, induced by the poisonous miasm of regetable decay. This exhalation is evolved by the action of solar heat on wet soil, and rises with the watery vapor from it. While the san is below the horizon this vapor insers near the earth's serface, and the virus is taken with it through the lungs into the blood. There it acts as an irritating poison on the inserval viscous and SOLE AGENTS FOR Lawrence Rolling Mill OF IRONTON, C., DEALERS IN Pig Iron, Bar, Boiler and Sheet Iron. PLOW SLABS & WINGS, NAILS,

as an irritating poison on the internal viscera and ex-creting organs of the body. The liver becomes torpid and fails to secrete not only this virus, but also the bile from the blood. Both the virus and the bile accumulate in the circulation, and produce violent constitutional disorder. The spluen, the kidneys, and the stomach sympathize with the liver, and become disordered also. Finally, the instituct of our organism, as if in an attempt to expet the noxious infusion, concertmes the whole blood of the body in the internal excretories to force them to east it out. The blood leaves the surface, and STREL, WINDOW GLASS, &c. rushes to the central organs with congestive violence.
This is the CHILL. But in this effort it fuls. Then the
FUVER follows, in which the blood leaves the central
organs and rushes to the surface, as if in another effort
to expel the irritating poison through that other great
exerctory—the skin. In this also it fails, and the system abandons the attempt exhausted, waiting for the

dermine the health if it is not renoved.

We have labored to find, and have found, an antidote, Ayer's Ague Cure, which neutralizes this malarious poison in the blood, and stimulate: the liver to expel it from the body. As it should, so it does care this afflicting disorder with effect certainty. And it does more, or rather does what is of more service to those subject to this infection.

If taken in season it expels it from the system as it is arieties, Ciathing, Boots, Shoes, Hats &c, absorbed, and thus keeps those who use it free from its attacks; keeps the system in health al-hough exposed to the disease. Consequently it not only cures, but protects from, the great variety of effections which are WE are now in receipt of our Stock of Goods for the FALL

This "AGUE CURE" removes the cause of these derangements, and

cures the disease.

This it accomplishes by stimulating the excretories to expel the virus from the system; and these organs by degrees become habited to do this their office of their own accord. Hence arises what we term acclimatation. FALL STOCK. DAM G. ADAMS. FELIX W. ASBAY.
